Lexington Estates Construction Begins

The Lexington Estates development, consisting of twelve (12) single-family homes, began construction on September 13. The homes are located in the new CED Subdivision located just west off of Adams Street in Lexington. Completion is slated for mid-Summer 2011. The project will consist of single-story single-family homes with three bedrooms, two baths and all roughly 1350 square feet.

Lexington Estates is being developed by Dana Point Development Corporation and will include extra amenities and upgrades such as extensive brick and exterior decorative accents, landscaping with underground irrigation, back patios accessed by a French door, Energy Star appliances, security systems, attached insulated 2 car garages with additional storage and more. Two entirely different floor plans will be built with each home having its own unique appearance with distinct exterior elevations, siding style/color, window type, brick placement/color, roof line/color, etc.

“This development fills a continued need for housing in Lexington and would certainly not be possible without the support and efforts from the City of Lexington and Dawson Area Development,” commented Matt Thomas, President of Dana Point Development Corporation.
