Luke Estates Moves Forward

Dana Point Development Corporation received funding approval from the Nebraska Investment Finance Authority for the Luke Estates project in North Platte, Nebraska.

Luke Estates will consist of ten (10) single-family homes and will be a combination of 3 & 4-bedroom plans. Yards will be fully landscaped with sod and various plants/shrubbery and automatic underground sprinklers. Other amenities included will be security systems, and an Energy Star appliance package: washer/dryer, refrigerator, microwave, range and dishwasher. Each home will include play equipment in the back yards.

Dana Point Development Corporation ("DPDC") was established in 2006 to develop market rate and affordable housing communities with a passionate focus on quality. DPDC offers many distinctive developments meeting the housing needs throughout Nebraska.

"We are elated to be moving forward with this 3 & 4-bedroom single-family home project which will provide housing for larger families. Luke Estates will not only itself meet the need for this type of housing but will also compliment our existing North Platte portfolio of single-family and senior housing," commented Matt Thomas, President of Dana Point Development Corporation.
